

# Conray®

## Iothalamate Meglumine Injection USP 60%

Not for Intrathecal Use

### Description

Conray® is an injectable, ionic, high osmolar contrast media agent packaged in glass vials and bottles. Conray® is a prescription drug that is therapeutically and biologically inert when injected into the body for use in organ or tissue enhancement in CT, X-Ray and Fluoroscopy imaging procedures. Each mL of Conray contains 600 mg of iothalamate meglumine, 0.09 mg edetate calcium disodium as a stabilizer and 0.125 mg of monobasic sodium phosphate as a buffer. The solution provides 28.2% (282mg.mL) organically bound iodine.

### Features and Benefits

Conray® is available in a wide variety of glass vials and bottles.

### Indications and Applications

Conray® is indicated for use in Excretory Urography, Cerebral Angiography, Peripheral Arteriography, Venography, Arthrography, Direct Cholangiography, Endoscopic Retrograde Cholangiopancreatography (ERCP), CT of the Head and Body, IV-DSA, and IA-DSA. For pediatric indications refer to package insert.

### Important Safety Information

The most frequent adverse reactions are nausea, vomiting, facial flush and a feeling of body warmth. Serious or fatal reactions have been reported due to the inadvertent intrathecal administration of iodinated contrast media, such as Conray. Serious, rarely fatal, thrombotic events causing myocardial infarction or stroke have been reported.

### Distribution

Direct or Distributor - M/s. **ADITHI MED X SOLUTIONS** – Karnataka, India
