

Optiray® 240

Ioversol Injection USP 51%, 240 mg/mL organically bound iodine

Not for Intrathecal Use

Description

Optiray® 240 is an injectable low osmolar, nonionic, contrast media agent which is intended for intravascular administration. Optiray® 240 is a prescription drug that is intended to be therapeutically and biologically inert when injected into the body for use in organ tissue enhancement in CT, X-Ray and Fluoroscopy imaging procedures. Each milliliter of Optiray® 240 contains 509 mg of ioversol, 3.6 mg of tromethamine as a buffer and 0.2 mg of edetate calcium disodium as a stabilizer.

Indications and Applications

Cerebral Arteriography, Venography, Excretory Urography, CT Head and Body.

Important Safety Information

Serious or fatal reactions have been reported due to the inadvertent intrathecal administration of iodinated contrast media, such as Optiray. Serious, rarely fatal, thrombotic events causing myocardial infarction or stroke have been reported.
